DUBLIN CASTLE,

13th November, 1911.

SIR,

I have to acknowledge the receipt of your letter of the 10th instant (G. 4261-11), forwarding, for submission to His Excellency the Lord Lieutenant, the Agricultural Statistics of Ireland, with Detailed Report for the Year 1910.

I am,

Sir,

Your obedient Servant,

J. B. DOUGHERTY.

The Secretary,

Department of Agriculture

and Technical Instruction,

Dublin.

AGRICULTURAL STATISTICS, IRELAND, 1910.

REPORT

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the detailed Annual Report on the Agricultural Statistics of Ireland for the year 1910. The present statistics, while including, for convenience of reference, and for the purpose of permanent record, several of the tables previously issued in the General Abstracts showing the Acreage under Crops, and the Numbers of Live Stock, and in the series of returns of the yields of the several crops, issued during the past year, furnish in addition (1) particulars of the number and size of agricultural holdings and of their distribution; (2) a comparative record of the changes which have taken place in the several counties during the past ten years as regards the extent and yield of the chief crops and the numbers of live stock; (3) statistics of the area of the chief kinds of bush and tree fruits; and (4), statistics of the area under woods and coppice, and of planting and felling operations.

The usual summary tables presented on pp. 2 *et seq.* show some of the chief results of the detailed tables, and also certain general and comparative statistics relating to agriculture.

The total area of Ireland was returned in the Census of 1901 as 20,345,328 statute acres. The inclusion of
Division of Land. 5,397 acres of reclaimed slob in the County
Wexford brings the total area to 20,350,725
statue acres. This total includes 117,135 acres under water, but
excludes close on half a million acres (487,418) under the large rivers,

lakes, and tideways. The following table shows the division of land in 1910 by provinces, and also for Ireland as a whole :—

TABLE showing by Provinces the Area under Crops, Hay, Pasture, Woods and Plantations, and Bog, Marsh, &c., in the year 1910 :—

	Leinster.	Munster.	Ulster.	Connaught.	Ireland.
	Acres.	Acres.	Acres.	Acres.	Acres.
Crops, Cereals, ..	375,903	265,822	530,380	128,074	1,300,079
Crops, Roots and Green,	250,908	251,218	346,544	163,417	1,012,087
Flax,	68	240	45,637	29	45,974
Fruit,	2,816	2,597	6,929	652	12,994
Hay, 1st year's, ..	143,309	111,866	227,301	34,706	517,182
Hay, 2nd and 3rd year's.	135,505	97,311	88,345	42,498	363,659
Permanent Meadow,	366,081	520,324	341,254	313,087	1,540,746
Pasture, Rotation, under 5 years.	315,418	330,739	825,931	115,086	1,587,174
Pasture, Permanent, 5 years and over.	2,408,585	2,826,021	1,280,691	1,765,853	8,281,150
Mountain Land, grazed,	206,692	740,485	902,961	737,876	2,588,014
Woods and Plantations,	91,890	99,685	53,825	50,427	300,827
Bog, Marsh and Barren Mountain Land.	312,562	443,116	345,014	634,887	1,735,579
Roads, Building Land, Water and Waste.	235,332	265,603	322,722	241,603	1,065,269
Total, ..	4,844,969	5,955,027	5,322,534	4,228,195	20,350,725

It will be seen from this table that the area under corn and green crops, flax and fruit, amounted in 1910 to 2,371,134 acres or 11·7 per cent. of the total area, the area under hay to 2,421,587 acres, or 11·9 per cent. of the total area, and the area of rotation and permanent pasture to 9,868,324 acres, or 48·5 per cent. of the total area. If to the pasture is added the grazed mountain land the total grazed area amounted to 12,456,338 acres or 61·2 per cent. of the total area of Ireland. Woods and plantations amounted to 300,827 acres, or 1·5 per cent. of the total area, while the remaining area, 2,800,839 acres, or 13·8 per cent. of the total area, consisted of bog, barren mountain, water, roads, building lands, waste, &c. In connection with this latter figure it will be seen by reference to Table I. page 22, that the area of barren or ungrazed mountain was returned in 1910 at 504,110 acres, the area of turf bog at 884,809 acres, the area of marsh at 346,660 acres, and the area of water, roads, building lands—including the area of towns and villages—waste, &c., at 1,065,260 acres.

A detailed comparison of the acreage under crops and hay in 1909 and 1910 has already been made in the "General Abstracts showing the Acreage under Crops," &c. [ed. 5378, 1910.] A summary table showing the changes in the acreage of the several crops will be found on page 4 of the present report, and particulars of the acreage of crops in each County and Poor Law Union in 1910 will be found on pp. 34 *et seq.*

As regards the main changes which have taken place during the past sixty years these are seen in the following table, which shows the areas respectively under corn crops, green crops, and flax, and hay, in each Census year since 1851 and in the year 1910:—

TABLE showing the Area under Corn Crops, Green Crops, and Flax and Hay in Ireland, in each of the years 1851, 1861, 1871, 1881, 1901, and 1910:—

YEAR.				Corn Crops.	Green Crops and Flax.	Hay.	Total.
				Acres.	Acres.	Acres.	Acres.
1851.	3,090,401	1,513,142	1,246,408	5,858,951
1861.	2,634,957	1,719,373	1,546,206	5,800,536
1871.	2,124,034	1,668,359	1,829,044	5,621,437
1881.	1,777,175	1,417,171	2,001,029	5,195,375
1891.	1,492,763	1,266,089	2,069,529	4,818,381
1901.	1,317,574	1,134,885	2,178,592	4,631,051
1910.	1,300,079	1,012,087	2,421,587	4,733,753
1910 compared with 1851				Decrease.	Decrease.	Increase.	Decrease.
				1,799,322	501,055	1,175,179	1,125,198
				Rate per cent.,			
				58.1	33.1	94.3	19.2

From this table it will be seen that in each decade from 1851 to 1901 there was a rapid fall in the area of corn crops, though the prices of cereals were, on the whole, well maintained both in Great Britain and in Ireland until 1878, and the marked fall in prices did not take place until after 1884. In the case of green crops the shrinkage in the area began considerably later than in cereals, for while there was to some extent a falling away in the acreage of green crops, in the later sixties, it was not until after 1875 that the decline in their acreage became regular and heavy. While the acreage of corn crops green crops and flax has fallen since 1851 by 2,300,377 acres, the area of hay has increased by over 1,000,000 acres, this increase being especially marked between 1851 and 1881.

It is of interest when considering these figures to have in view the changes in the same crop areas during the past ten years as shown in the following table :—

TABLE showing the Area under Corn Crops, Green Crops and Flax, and Hay in Ireland in each year from 1901 to 1910, inclusive :—

YEAR.				Corn Crops.	Green Crops, including Flax.	Hay.	Total.
				Acres.	Acres.	Acres.	Acres.
1901,	1,317,574	1,134,885	2,178,592	4,631,051
1902,	1,306,568	1,120,135	2,168,464	4,595,167
1903,	1,306,345	1,104,468	2,224,165	4,634,978
1904,	1,279,189	1,094,776	2,260,160	4,634,125
1905,	1,271,190	1,090,531	2,294,606	4,656,227
1906,	1,309,343	1,088,885	2,330,016	4,728,244
1907,	1,294,991	1,062,639	2,281,318	4,638,948
1908,	1,261,715	1,055,813	2,298,793	4,616,321
1909,	1,251,795	1,039,781	2,278,538	4,570,114
1910,	1,300,079	1,012,067	2,421,587	4,733,753
1910 compared with 1901				Decrease.	Decrease.	Increase.	Increase.
				17,495	122,798	242,995	102,702
				Rate per cent.,			
				1.3	10.8	11.2	2.2

From this table it will be seen that the fall in the area of corn crops has amounted, in the ten years 1901–1910, to 17,495 acres, or 1.3 per cent. of the total area, while the decrease in green crops, including flax, amounted to 122,798 acres, or 10.8 per cent. Meanwhile the area under hay has increased by 242,995 acres, or 11.2 per cent.

The shrinkage in the area of crops during the past fifty years has been very marked in all four provinces, but it is of interest to compare the changes in the extent of the corn, green crops, and hay acreage at different periods respectively in Leinster, Munster, Ulster and Connaught.

The following summaries show the crop acreage by provinces for the Census years since 1851 and for the year 1910:—

TABLE showing the Area under Corn Crops, Green Crops and Flax, and Hay in the Province of LEINSTER in each of the years 1851, 1861, 1871, 1881, 1891, 1901, and 1910:—

YEAR.				Corn Crops.	Green Crops, including Flax.	Hay.	Total.
				Acres.	Acres.	Acres.	Acres.
1851,	960,883	343,966	481,564	1,786,413
1861,	746,643	351,989	547,122	1,645,754
1871,	623,742	359,151	621,765	1,604,658
1881,	512,775	298,353	628,253	1,439,381
1891,	428,619	282,333	590,643	1,301,595
1901,	373,858	257,205	597,662	1,228,725
1910,	375,803	250,908	644,895	1,271,606
1910 compared with 1851				Decrease.	Decrease.	Increase.	Decrease.
				685,080	93,058	163,331	514,807
Rate per cent.,				60.9	27.1	33.9	28.1

TABLE showing the Area under Corn Crops, Green Crops and Flax, and Hay in the Province of MUNSTER in each of the years 1851, 1861, 1871, 1881, 1891, 1901, and 1910:—

YEAR.				Corn Crops.	Green Crops including Flax.	Hay.	Total.
				Acres.	Acres.	Acres.	Acres.
1851,	732,294	403,973	372,072	1,508,339
1861,	597,435	431,189	448,171	1,476,795
1871,	439,091	393,721	525,266	1,358,078
1881,	361,914	315,945	593,257	1,271,116
1891,	291,789	291,824	605,619	1,189,232
1901,	263,526	268,096	657,235	1,188,857
1910,	265,822	251,218	729,501	1,246,541
1910 compared with 1851				Decrease.	Decrease.	Increase.	Decrease.
				466,472	152,755	357,429	261,798
				Rate per cent.,	63.7	37.8	96.1
							17.4

TABLE showing the Area under Corn Crops, Green Crops and Flax, and Hay, in the Province of ULSTER in each of the years 1851, 1861, 1871, 1881, 1891, 1901 and 1910 :—

YEAR.				Corn Crops.	Green Crops, including Flax.	Hay.	Total.
				Acres.	Acres.	Acres.	Acres.
1851,	1,046,417	545,433	260,145	1,851,995
1861,	942,804	637,378	372,801	1,952,983
1871,	800,397	838,401	465,687	1,904,485
1881,	699,827	577,882	501,771	1,779,480
1891,	614,384	498,947	572,153	1,685,484
1901,	550,465	438,683	598,495	1,587,643
1910,	530,380	346,544	656,900	1,533,824
1910 compared with 1851				Decrease.	Decrease.	Increase.	Decrease.
				516,037	198,889	396,755	318,171
				Rate per cent.,	49.4	36.5	152.5
							17.2

TABLE showing the Area under Corn Crops, Green Crops and Flax, and Hay, in the Province of CONNAUGHT in each of the years 1851, 1861, 1871, 1881, 1891, 1901, and 1910 :—

YEAR.				Corn Crops.	Green Crops, including Flax.	Hay.	Total.
				Acres.	Acres.	Acres.	Acres.
1851,	359,807	219,770	132,627	712,204
1861,	338,055	298,817	178,112	814,984
1871,	259,904	277,086	216,326	753,316
1881,	202,659	224,991	277,748	705,398
1891,	167,980	192,985	291,114	652,079
1901,	129,725	170,901	325,200	625,826
1910,	128,074	163,417	390,291	681,782
1910 compared with 1851				Decrease,	Decrease,	Increase,	Decrease,
				231,733	56,353	257,664	30,422
				Rate per cent.,	64.4	25.6	194.3
							4.3

These tables show that, comparing 1910 with 1851, the decline in tillage of Corn and Green Crops has been greatest in Munster and least in Ulster.

With regard to the changes which have taken place in the areas of the several corn and grain crops the following table gives a summarised return for the several changes in the area of Corn Crops, Census years from 1851, and also for the 1851-1910. year 1910 :—

TABLE showing the Area under the various Cereal Crops in each of the years 1851, 1861, 1871, 1881, 1891, 1901, and 1910.

YEAR.	CORN CROPS.							
	Wheat.	Oats.	Barley.	Bere.	Rye.	Beans.	Pease.	Total Corn Crops.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.

		466,617	1,316,085	167,966		11,616	26,696	20,262
	Rate per cent	90.6	51.9	50.9		56.9	93.6	58.1

Wheat.

The great decline in the wheat area has chiefly affected the provinces of Leinster and Munster. In 1851 the area of wheat in Leinster was 202,578 acres, in Munster 180,260 acres, in Ulster 90,188 acres, and in Connaught 31,213 acres. In 1910 the area of wheat in Leinster was 19,578 acres, in Munster 12,853 acres, in Ulster 10,708 acres, and in Connaught 4,492 acres.

Oats.

With regard to oats, which in 1910 represented 1,073,690 acres, out of a total area of cereal crops amounting to 1,300,079 acres, the decline has been very marked in all four provinces, the percentage of decrease being greatest in Leinster. In 1851 the area under oats was in Leinster 614,535 acres, in Munster 399,534 acres, in Ulster 888,419 acres, and in Connaught 287,287 acres. In 1910 the area in Leinster was 235,726 acres, in Munster 209,812 acres, in Ulster 512,668 acres, and in Connaught 115,484 acres. It will be seen that at the present day almost half the total acreage of oats is in Ulster.

Barley and Bere.

The total area under Barley and Bere has declined from 335,964 acres in 1851 to 168,008 acres in 1910, or by 50 per cent. In 1851 the acreage of barley and bere in Leinster was 125,392 acres and in 1910 was 119,023 acres, the net change being small. In the other provinces the area of barley and bere has greatly declined. In 1851 the area in Munster was 137,568 acres as compared with 41,506 acres in 1910, in Ulster it was 42,924 acres in 1851 as compared with 3,849 in 1910, and in Connaught it was 30,080 acres in 1851 as compared with 3,630 in 1910.

Rye.

In the case of rye the decline in the acreage has taken place chiefly in Leinster and in Ulster. In 1851 the acreage of rye was 6,942 acres as compared with 1,478 in 1910; in Leinster 3,940 acres in 1851 as compared with 1,128 acres in 1910; and in Munster 2,838 acres in 1851 as compared with 1,610 acres in 1910. In Connaught the area of rye has changed to a much less extent, being 5,977 acres in 1851 and 4,465 acres in 1910.

With regard to the changes in the area of green crops, the following table presents the figures for each Census year since 1851, and for the year 1910:—

TABLE showing the area under the various Green and Root Crops and Flax in each of the years 1851, 1861, 1871, 1881, 1891, 1901, and 1910:—

YEAR.	GREEN CROPS.											FLAX.

Potatoes.

The heavy decline in the area of potatoes since 1861 has taken place in all four provinces. In 1861 the area in Leinster amounted to 214,558 acres, in Munster to 291,000 acres, in Ulster to 388,417 acres, and in Connaught to 239,529 acres. In 1910 the area under potatoes was in Leinster 112,634 acres, in Munster 132,119 acres, in Ulster 241,780 acres, and in Connaught 116,452 acres. Proportionately to the total area of potatoes the decrease has been greatest in Munster and least in Ulster.

Turnips and Mangels.

The shrinkage in area began earlier in the case of turnips than in mangels, but, allowing for the increase which has taken place in mangels, has been much less marked. In Leinster in 1851 the area under turnips was 104,069 acres, and under mangels 13,344 acres. In 1910 the area under turnips was 92,015 acres, and under mangels 26,365 acres. Thus there has been a slight increase in Leinster in the combined areas under turnips and mangels. In Munster there has been a considerable shrinkage, the area under turnips in 1851 amounting to 125,493 acres, as compared with 72,945 acres in 1910. But against this decline has to be set an increase in the area of mangels from 7,470 acres in 1851 to 35,186 acres in 1910. In Ulster the area of turnips in 1851 was 108,216 acres. In 1861 the area had fallen to 81,973 acres, but rose again to 90,479 acres in 1871. In 1910 the area amounted to 86,202 acres. The area of mangels in Ulster is small. In 1851 it was 3,761 acres, and in 1910 it amounted to 5,123 acres. The net change in the area of roots in Ulster has thus been small, and this is true especially of the past thirty-five years. In Connaught the area under turnips has always been very limited, but notwithstanding this, the decline, proportionately to the area, has been more marked than in any other province. In 1851 there were 45,770 acres in Connaught under turnips, as compared with 24,134 acres in 1910. The area of mangels in 1851 was 1,272 acres and in 1910 amounted to 8,593 acres.

Cabbage.

The increase in the area of cabbage in the period 1851-1910 has taken place in all the provinces except Ulster, but especially in Munster, where the area in 1851 was 8,063 acres, and in 1910, 12,443 acres.

Flax.

In the case of flax, of the total area in 1851 of 140,536 acres, there were in Ulster 125,407 acres, in Leinster 4,889 acres, in Munster 5,991 acres, and in Connaught 4,249 acres. The great decline in the area has taken place in the past thirty years, the area returned for Ulster in 1881 being 143,873 acres. The area in 1910 was in Ulster 45,637 acres, in Leinster 68 acres, in Munster 240 acres, and in Connaught 29 acres.

Hay.

While the area of corn and green crops has been shrinking the area of hay has been extending. The following table shows the total area under hay in each Census year since 1851, and in the year 1910 :—

Total Area under Hay, 1851-1910.

					ACRES.
1851,	1,346,408
1861,	1,546,206
1871,	1,829,044
1881,	2,001,029
1891,	2,059,529
1901,	2,178,592
1910,	2,421,587

With these figures may be compared the following table showing the total area of hay in each of the past ten years :—

Total Area under Hay, 1901-1910.

					ACRES.
1901,	2,178,592
1902,	2,168,464
1903,	2,224,165
1904,	2,260,160
1905,	2,294,506
1906,	2,330,016
1907,	2,281,318
1908,	2,298,793
1909,	2,278,538
1910,	2,421,587

Thus it appears that from 1851 to 1881 there was in each decade a marked increase in the area of hay, but in the twenty years which followed the increase was much smaller. After 1902, however, there has again been a very considerable extension in the area of this crop.

It will be seen from the summary table on page vi. that in 1910 the area under first year's hay amounted to 517,182 acres, the area under second and third year's hay to 363,659 acres, and the area of hay on permanent meadow to 1,540,746 acres. The area of rotation hay is largest in Ulster and in Leinster. The largest area of hay on permanent meadow is in Munster. In Connaught the area under permanent meadow is very large in proportion to the extent of rotation hay.

Pasture.

The total area under corn crops, green crops, flax and hay, amounted in 1851 to 5,858,951 acres, and in 1910 to 4,779,727 acres—a decrease of 1,079,224 acres. This figure represents approximately the increase in the area of pasture in the period 1851 to 1910. There have also been changes from year to year in the grazed area of moor, marsh, and mountain land, but this marginal grazing land is always difficult to classify and to compare, and its value is relatively small. In 1910

the area of pasture, other than grazed mountain, amounted to 9,868,324 acres, while the area of grazed mountain land amounted to 2,588,014 acres, the total area of pasture and rough grazing being 12,456,338 acres.

Fruit.

Owing to the increasing importance of the fruit crop in Ireland returns have been obtained in the past five years differentiating as far as possible the areas under the chief separate classes of fruit. As will be readily understood, however, there is considerable difficulty in making a return of the areas respectively of the several fruit crops owing to the large extent to which these are grown mixed in the same area. As far as possible the extents of the several crops have been returned separately, though, as will be seen from table 13, p. 94, the area returned as under mixed fruit represents a very considerable proportion of the total area of fruit.

The total area of fruit in 1910 was returned as 12,994 acres as compared with 12,583 acres in 1909, an increase of 411 acres. There were in Ulster 6,929 acres—more than half the total area under fruit in Ireland—in Leinster 2,816 acres, in Munster 2,597 acres, and in Connaught 652 acres. Much the largest extent of fruit is in County Armagh, where there were 4,166 acres in 1910, the next largest total being that of County Cork, amounting to 1,122 acres. The total area of fruit in Ireland, returned as 12,994 acres, was divided as follows:—Gooseberries, 662 acres; strawberries, 730 acres; raspberries, 244 acres; red and white currants, 133 acres; black currants, 248 acres; apples, 6,277 acres; pears, 262 acres; plums, 211 acres; damsons, 152 acres; other fruits, 148 acres; while there were 3,927 acres returned as under mixed fruits.

Varieties of Potatoes.

Since 1880 an annual return has been made of the acreage of each variety of potato in Ireland. As already stated, the acreage under potatoes in Ireland in 1910 was 592,985, as compared with 579,799 acres in the year 1909, showing an increase of 13,186 acres.

The acreage under each of the principal varieties of potatoes planted in 1910, with the percentage of the total, was as follows:—

—	Acre.	Per Cent.	—	Acre.	Per Cent.
Champion, ..	346,432	58.5	American Early Roses ..	1,784	3.0
Up-to-Date, ..	94,055	15.8	Windsor Castle, ..	1,760	
Beauty of Bute, ..	28,361	4.8	Irish Queens, ..	1,735	
Black Skinned, ..	27,517	4.6	Scotch Triumph, ..	1,565	
British Queen, ..	21,097	3.6	Northern Stars, ..	1,483	
Irish Whites, ..	18,845	3.2	Gawkes, ..	1,481	
Sutton's, ..	17,650	3.0	Leather Coats, ..	1,199	
Flourish, ..	15,404	2.6	All Others ..	12,408	

The main feature of this statement is that 58·5 per cent. of the acreage under the potato crop in Ireland consisted of Champions, leaving only 41·5 per cent. for all other varieties—the percentage of some of these being so small as to be barely appreciable when put into figures.

From the following table it will be seen that during the past twenty years the area of Champions has greatly decreased. In 1891 the area amounted to 79·7 per cent. of the total acreage of potatoes, whereas in 1910 it was 58·5.

TABLE showing for the years 1890-1910 the total area under Potatoes, and the extent under "Champions," with the number of acres under that variety in every 100 acres under Potatoes.

YEARS.	Total Area under Potatoes.	Area under Champions.	Proportion per cent. under Champions.	YEARS.	Total Area under Potatoes.	Area under Champions.	Proportion per cent. under Champions.
	Statute Acres.	Statute Acres.			Statute Acres.	Statute Acres.	
1891, ..	755,532	600,403	79·7	1901, ..	635,321	421,866	66·4
1892, ..	740,625	585,996	79·2	1902, ..	638,304	412,200	65·5
1893, ..	725,735	572,683	79·1	1903, ..	620,393	395,043	63·7
1894, ..	717,000	562,674	78·5	1904, ..	618,540	379,368	61·3
1895, ..	710,486	552,065	77·7	1905, ..	616,755	363,017	58·9
1896, ..	705,065	539,573	75·0	1906, ..	616,107	344,692	56·0
1897, ..	677,216	491,673	72·6	1907, ..	590,998	321,307	54·4
1898, ..	664,864	465,731	70·0	1908, ..	587,144	320,785	54·6
1899, ..	662,014	451,133	68·0	1909, ..	579,790	304,271	52·0
1900, ..	634,070	432,322	66·1	1910, ..	592,985	346,652	58·5

A reference to Table 11, pages 86-87, where the acreage under potatoes is set out for each variety by counties and provinces and for the whole of Ireland, will show that the proportion of Champions is much the greatest in Connaught and Munster. On the other hand in the counties of Antrim, Down and Dublin the area of Up-to-Dates is greater than that of Champions, while there are also large areas of other varieties of potatoes.

The decline in the area under the cereal, root, and green crops is a feature which stands out in the history of agriculture not only in Ireland, but also in England and Wales, and to a less degree in Scotland. The following tables present summarily the changes in the areas under cereal, root, and flax crops since 1867, from which year comparative information is available:—

—	1867.	1871.	1881.	1891.	1901.	1910.
Ireland (area 20,350,725 acres).

(a) Not distinguished in Returns for 1867.

The estimated produce of crops in 1910 has been already published in a series of statements showing the yield

Produce of Crops. in the several counties. The wet summer was very unfavourable for grain crops and potatoes and for the quality of the hay crop.

Summary tables showing the total produce of the several crops, the average yield per statute acre, and a comparison of yields for the past ten years will be found on pp. 6-8 of this report. The following summary states briefly the position as regards the several crops.

Hay.

The yield of all kinds of hay was very much heavier in 1910 than in 1909. The greater part of the crop was, however, much inferior to that of the previous year in quality as fodder, owing to the very unfavourable weather conditions under which cutting and saving had to be carried out. The average yields per statute acre of the three descriptions of hay in the two seasons were as follows:—

1ST YEAR'S HAY.		2ND AND THIRD YEARS' HAY.		PERMANENT MEADOW.	
1910.	1909.	1910.	1909.	1910.	1909.
Tons. 2.2	Tons. 1.8	Tons. 2.0	Tons. 1.7	Tons. 2.5	Tons. 2.1

The total quantity of first year's hay was estimated at 1,144,796 tons in 1910, as compared with 899,748 tons in 1909; second and third years' hay at 743,384 in 1910, as compared with 574,059 tons in 1909, and hay from permanent meadow at 3,890,064 tons, as compared with 3,102,370 tons in 1909.

Grain Crops.

The season of 1910 was an unfavourable one for the grain crops. The continuous rain and lack of sunshine which prevailed during the month of August had an injurious effect on the yield of the three chief crops. Owing to the want of necessary heat during the last weeks of the ripening stage, the grain did not fill so satisfactorily as in other years. The falling off in the yield was more pronounced in the case of Barley than in either Wheat or Oats, and the proportion of barley unfit for malting was larger than usual. The average rates of yield in grain crops in 1910 as compared with 1909 and the ten-yearly average, 1900-1909, were as follows:—

—		Wheat.	Oats.	Barley and Bere.	Rye.	Beans.	Pease.
1909.	..	cwt.s. 21.6	cwt.s. 18.7	cwt.s. 21.9	cwt.s. 15.5	cwt.s. 23.9	cwt.s. 16.4
1910.	..	19.3	17.5	17.5	15.2	22.5	15.0
Average for 1900-1909		18.8	16.5	18.3	13.7	22.3	14.8

The total yield of Wheat in 1910 was 919,384 cwt.s., a decrease of 20,431 cwt.s. as compared with 1909; of Oats 18,791,494 cwt.s., a

decrease of 608,009 cwts.; of Barley and Bere 2,934,104 cwts., a decrease of 640,089 cwts.; of Rye 131,630 cwts., an increase of 15,972 cwts.; of Beans 41,337 cwts., an increase of 2,552 cwts.; and of Pease, 3,443 cwts., a decrease of 895 cwts.

Potatoes.

The average yield of the potato crop in Ireland in 1910 was estimated at 4·8 tons per statute acre, as against 5·5 tons in 1909, and 4·5 tons for the ten-year period—1900-1909. The acreage of the crop in 1910 amounted to 592,985 acres, as against 579,799 acres in 1909, an increase of 13,186 acres, and the total produce of the crop in 1910 was estimated at 2,870,827 tons, as against 3,202,819 tons in 1909. The persistent rain and low temperature of August did much damage to the crop on low-lying lands and a large area was badly flooded. Spraying was carried out with difficulty, and would have been more widely practised but for the unfavourable weather conditions. Except on high dry soils the quality of the tubers was not so good as in other seasons. Considerable variation in yield was noticeable in the different counties, but only in one or two instances did the estimated yields exceed the previous year's returns. Another noticeable feature of the 1910 crop was the abnormally large proportion of small sized tubers, due no doubt to the lack of heat at the concluding stages of growth. The crop, however, was raised under very favourable conditions of weather. The average rate for the Province of Leinster was 4·4 tons in 1910 per statute acre, as against 5·3 tons in 1909. In Munster the average was 4·6 tons in 1910 as against 5·4 tons in 1909. In Ulster the average was 5·5 tons in 1910, as against 5·7 tons in 1909. In Connaught the yield was 4·1 tons in 1910 as against 5·5 tons in 1909.

Roots and Cabbage.

The weather conditions of the 1910 season did not favour a full development of the two main root crops. The continuous rain during August, as well as the low temperature and lack of sunshine which prevailed at that stage, checked growth considerably. Except on high dry, well-drained soils, fields as a rule carried poor crops, and in many instances owing to the nature of the season were much overrun with weeds. The bright and warm weather of September and early October effected some improvement, but was too late to be of much benefit, especially in the case of low-lying fields. The average rates of yield per Statute acre for Turnips and Mangels were under those obtained in the previous season, but were above the average of the previous ten years. The yields of Carrots and Parsnips were satisfactory, and both crops showed a material advance on the previous season's produce.

The Cabbage crop appears to have been suited by the character of the Summer, and the yields obtained were quite up to the previous year's average and exceeded the ten year's average. The average rates

of yield of above crops in 1910 as compared with 1909 and the average for the ten years 1900-1909 were as follows :—

—			Turnips.	Mangel Wurzel and Beet Root.	Carrots.	Parsnips.	Cabbage.
			Tons.	Tons.	Tons.	Tons.	Tons.
1909,	17.9	19.6	9.4	9.8	11.3
1910,	16.8	19.5	11.1	11.5	11.3
Average, 1900-1909,			16.5	18.3	9.9*	9.6*	10.4

* For the Period 1901-1909 only.

In 1910 there was a decrease of 1,648 acres in the area of Turnips, and the total yield was 4,624,341 tons, a decrease of 345,698 tons as compared with 1909. In the case of Mangels there was an increase of 1,830 acres, and a total yield of 1,466,328 tons, an increase of 24,171 tons over the 1909 estimate. Carrots showed a decrease of 45 acres in area, and a total yield of 16,560 tons, an increase of 2,088 tons; Parsnips an increase in area of 20 acres, and a total yield of 8,085 tons, an increase of 1,365 tons in comparison with 1909. Cabbage showed a decrease of 8,573 acres in area, and a total yield of 348,747 tons, being a decrease of 95,482 tons as compared with 1909.

Flax.

Not for many years did growers obtain such a favourable seed-time as in 1910, but, notwithstanding the fact that the crop was put in under very satisfactory conditions of soil and weather, the low temperature which persisted throughout May seriously interfered with the progress of the brairds and in some districts much injury was done at this period by severe hail showers. The crop, however, made a good recovery during June and fields as a rule were clean and healthy looking. The break in the weather at Mid-July caused the crop to be greatly tangled at pulling time and rendered this operation more tedious and costly than usual. While being steeped, continuous rains caused serious flooding in low-lying districts and many instances were reported of growers losing heavily from this cause. Lifting also was much delayed owing to the constant rain, and great difficulty was experienced in getting the earlier portion of the crop together in good dry condition. The fine dry weather of September enabled the later spread flax to be stacked in splendid order, but it also restricted the supply of water available for many of the smaller mills and thus prevented the normal supplies of fibre from coming into the market in the earlier weeks of the scutching season.

The returns in the 1910 season proved to be much the same as those obtained in 1909. The average rate of produce worked out at 30.9 stones per Statute acre against 30.1 stones in 1909, or 2.9 stones below the average for the 10 years 1900-1909.

The quality as a rule may be described as variable. The number of really good lots marketed were few and samples on the whole were not up to the general standard. However, in some districts the quality was reported as comparing favourably with the last three years. In districts where earlier sowing is becoming more general scutch-mill owners assert that a less hulk of straw is produced which yields fibre of a finer quality. In many cases the fibre was weak owing to over-grassing.

The total area under flax in 1910 was 45,974 acres, as compared with 38,110 acres in 1909, an increase of 7,864 acres. The total produce of the crop in 1910 was estimated at 1,420,122 stones, as against 1,148,571 stones in 1909, an increase of 271,551 stones.

The numbers of the various classes of live stock in 1910, and the changes as compared with 1909 have been

Live Stock.

already published in the General Abstracts, and particulars as to the numbers of stock in each county and union in 1910 are shewn in pp. 98 *et seq.* of the present report.

The following table shows the changes in the total numbers of live stock which have taken place in the period 1851-1910. At the same time it will be remembered that statistics of numbers are only one index of change, and that the improvement in stock is equally if not more important.

Years.	Horses.	Mules and Jennets.	Asses.	Cattle.	Sheep.	Pigs.	Goats.	Poultry.
1851	521,706	21,606	136,981	2,967,461	2,122,128	1,084,857	235,313	7,470,694
1861	614,232	20,146	173,711	3,471,688	3,556,050	1,102,042	189,842	10,371,175
1871	538,095	19,817	180,373	3,976,372	4,233,435	1,621,423	231,373	11,717,182
1881	548,354	26,392	187,143	3,956,595	3,256,185	1,095,830	266,078	13,972,426
1891	592,819	28,660	216,268	4,448,511	4,722,613	1,367,712	336,337	15,276,128
1901	564,916	28,882	238,980	4,673,323	4,378,750	1,219,135	312,409	18,810,717
1909	599,185	30,479	243,666	4,699,564	4,133,358	1,149,179	232,041	24,104,934
1910	613,244	31,460	240,677	4,688,888	3,979,516	1,200,005	242,614	24,339,015

A table showing the number of milch cows, including heifers in calf, in Ireland since 1854 will be found in Table S, page 19, from which it will be seen that the number in recent years, while showing a considerable increase as compared with the period from 1880 to 1900, is still below the record of the years from

Number of Milch Cows.

1857 to 1860. Meanwhile the total number of cattle having increased, the proportion of milch cows is considerably lower than in the earlier period.

In regard to live stock, compared with England, Scotland, and Wales, the outstanding features in Ireland are relatively the large number of cattle and the very small number of sheep. The following table shows the number of live stock in England, Wales, Scotland, and Ireland, in the year 1867 (from which date comparative statistics are available), in the Census years from 1871, and in the year 1910 :—

(a) Statistics not collected until 1860.

In connection with the statistics of cattle, it is of interest to see the changes in the numbers of live stock exported from Ireland to Great Britain and the Isle of Man. Considerable fluctuations occur from year to year, and the exports are shown in the following table for a period of ten years. The years taken are the periods of twelve months ended 31st May as the figures will thus best indicate one of the causes of increase or decrease in the numbers of live stock enumerated in Ireland on the 1st June.

NUMBERS of Cattle, Sheep, Swine, and Horses exported from Ireland to Great Britain and the Isle of Man during each of the years ended 31st May, 1901-1910.

YEARS.			Cattle.	Sheep.	Swine.	Horses.
1901,	728,719	874,181	644,479	28,490
1902,	672,489	863,884	620,497	26,269
1903,	1,040,157	1,051,319	625,354	26,056
1904,	806,558	790,409	525,703	27,683
1905,	795,446	734,235	420,069	29,267
1906,	733,735	689,576	379,368	32,947
1907,	783,686	643,779	478,594	33,626
1908,	863,528	686,662	470,509	30,469
1909,	865,422	761,547	324,683	29,939
1910,	846,967	842,499	316,287	30,737

The following table shows the proportion of the number of cattle, sheep, swine, and horses exported to their total number in Ireland for each of the years 1901-1910 :—

YEAR.			Percentage of Cattle, Sheep, Swine, and Horses Exported, to Total Cattle, Sheep, Swine, and Horses in Ireland.			
			Cattle.	Sheep.	Swine.	Horses.
1901,	15.6	20.0	52.9	5.0
1902,	14.1	20.5	46.7	4.5
1903,	22.3	26.6	45.3	4.4
1904,	17.3	20.7	39.8	4.6
1905,	17.1	19.6	36.2	4.8
1906,	15.8	18.5	30.6	5.5
1907,	16.7	16.9	36.3	5.6
1908,	18.0	16.7	38.6	5.0
1909,	18.4	18.4	28.2	5.0
1910,	18.1	21.2	26.3	5.0

According to the returns received there would appear to have been a decrease of 1·1 per cent. in the quantity of honey produced in 1909 as compared with the preceding year, the returns for which showed

Bee-keeping. an increase of 37·1 per cent. as compared with the quantity in 1907. The quantity of honey produced, according to the returns, was 436,867 lbs.; of this 135,629 lbs. were produced in the Province of Leinster, 121,072 lbs. in Munster, 101,192 lbs. in Ulster, and 78,974 lbs. in Connaught. Of the 436,867 lbs., 351,991 lbs. were produced in hives having movable combs, and 84,876 in other hives. It was stated that 138,687 lbs. was run honey, and 298,180 lbs. section honey. The number of stocks brought through the winter of 1909-1910 amounted to 26,741, of which 17,895 were in hives having movable combs, and 8,846 in other hives. According to the returns collected, there were 4,527 lbs. of wax manufactured in 1909, of which 3,922 lbs. were from hives having movable combs, and 605 lbs. from other hives.

In connection with the statistics of bee-keeping, it should be stated that from the nature of the case there is great difficulty in obtaining returns which approach completeness. The collection, therefore, of information by local societies of bee-keepers, and their co-operation with the Department in making the returns as complete as possible is of great importance. Few countries have any satisfactory record of their production of honey, but, with co-operation and organisation among bee-keepers, the difficulties can be largely overcome.

FORESTRY.

Of the total area of Ireland, about 1·5 per cent. is under woods. The woods in England are 5·3 per cent., in Scotland 4·5, and in Wales 3·9 per cent. of the total areas.

Since 1851 (with the exception of the year 1852) the acreage under woods and plantations has been ascertained annually in connection with the Agricultural Statistics; but, until the year 1890, the total extent was the only information sought for, no particulars as to the kind of trees having been obtained. In that year returns giving the latter information were collected, and the returns were published in a table, showing, by counties, the distribution of the various descriptions of trees.

The following table shows the acreage returned as under woods and plantations in the year 1851, and in each year from 1853 to 1910, inclusive :—

Acreage under Woods and Plantations.

Year.	Statute Acres.	Year.	Statute Acres.	Year.	Statute Acres.
1851	304,906	1871	324,990	1891	311,554
1852	No Return.	1872	325,703	1892	309,586
1853	305,221	1873	323,656	1893	307,386
1854	308,352	1874	322,268	1894	309,276
1855	306,476	1875	318,665	1895	308,928
1856	306,086	1876	324,152	1896	307,407
1857	313,817	1877	329,536	1897	307,441
1858	313,271	1878	328,687	1898	307,661
1859	318,874	1879	336,846	1899	308,495
1860	315,324	1880	339,858	1900	304,863
1861	316,597	1881	328,703	1901	305,391
1862	317,345	1882	328,969	1902	305,080
1863	317,134	1883	331,245	1903	303,304
1864	318,983	1884	332,006	1904	303,194
1865	322,152	1885	329,447	1905	302,933
1866	327,890	1886	329,662	1906	302,901
1867	323,420	1887	329,363	1907	302,188
1868	322,258	1888	331,587	1908	301,636
1869	320,461	1889	326,343	1909	301,444
1870	320,853	1890	327,461	1910	300,827

In 1907 certain changes were introduced in the inquiries made with a view to ascertaining the area respectively under conifers and under broad-leaved trees, and likewise the area of mixed conifers and broad-leaved. The ages also of the plantations were ascertained as far as possible. A statistical summary of similar information obtained for 1910 is shown by provinces, counties and for all Ireland on pp. 136 *et seq.*

In 1910, of the total extent of 300,827 acres in Ireland, 293,919 acres were returned as under Forest Trees, 5,921 acres as coppice or scrub, 409 acres as osier beds, and 578 acres as nursery plantations. Out of the total area of 300,827 acres, 91,890 acres were in Leinster, 99,685 acres in Munster, 58,825 acres in Ulster, and 50,427 acres in Connaught. In Munster the largest areas were in the Counties of Cork and Tipperary, where 26,139 acres and 24,443 acres respectively were returned as under woodlands. In Ulster the largest total was in County Down, where the extent of woodlands was returned in 1910 at 13,093 acres. In Connaught much the largest area was in County

Galway, where the total extent was returned at 23,457 acres. The returns further show that of the total area under woods, 95,447 acres consisted of conifers, larch, spruce, fir, pine, etc., 64,266 acres of broad-leaved trees, oak, ash, beech, sycamore, etc., while 134,206 acres were areas of mixed conifers and broad-leaved. It should be understood however, that it is not easy to ascertain accurately the area of woods or to distinguish them into even the above general classes, but special investigations made as to the extent of existing woodland areas confirm the returns.

A further consideration of importance is the age of the existing woodlands. According to the returns furnished it would appear that of the above 293,919 acres returned as under forest trees, 21,919 acres were from 1 to 25 years, 49,847 of from 26 to 50 years, 40,963 as from 51 to 75 years, and 60,869 of 76 years and over, while with regard to an area of 120,321 acres, or roughly two-fifths of the total area, the trees were of various ages. Inquiry was also made in 1910 as to the areas under forest trees which were respectively closed and open, and it was ascertained that 218,608 acres were enclosed forest, while 75,311 were open woodland.

The inquiries as to planting and felling operations instituted in 1890, and continued in the nineteen following years were repeated in 1910. According to the returns, during the year ended 30th June, 1910, 1,174 acres were planted with trees, 176 acres more than the extent planted in the preceding year.

The number of trees returned as felled, both for clearance and for thinning plantations, amounted in 1910 to 755,863. The area returned as cleared is 1,790 acres. Of the trees felled 489,206 were used for mining purposes, which appears to have been the chief purpose to which the timber of almost all descriptions was applied. The numbers applied to the principal specified uses comprise also:—31,935 trees for railway purposes, 30,298 for paling, gates, etc., 2,054 for spools and bobbins, 12,268 for fuel, 34,476 for furniture and building purposes, 14,303 for carts, waggons, farm implements, etc., 8,820 for clog soles, 3,760 for ship and boat building, 53,043 for butter and egg, etc., boxes and packing cases, and 672 for telegraph and telephone poles.

HOLDINGS AND OCCUPIERS.

One of the questions of greatest importance in the agricultural economy of the country is the distribution of land and the extent of cultivation on the different classes of land. The following table shows

the number and size of holding in 1910 in the four provinces and for all Ireland :—

Number and Size of Holdings in the Year 1910.

Size of Holdings.	Leinster	Munster	Ulster.	Con-naught.	Ireland.
Not exceeding 1 acre,	29,831	27,045	22,161	7,094	86,131
Above 1 and not exceeding 5 acres,	17,406	12,514	20,075	12,093	62,148
" 5 " " 15 "	25,072	19,692	62,860	46,458	154,088
" 15 " " 30 "	22,137	24,592	53,882	36,070	136,681
" 30 " " 50 "	15,513	22,605	25,379	12,421	75,918
" 50 " " 100 "	14,357	23,157	14,732	6,464	58,710
" 100 " " 200 "	6,950	9,424	3,656	2,787	22,817
" 200 " " 500 "	2,728	2,629	1,003	1,461	7,821
Above 500 acres,	423	382	303	474	1,582
Total No. of Holdings, ..	134,477	142,040	204,057	125,322	605,896

With regard to holdings not exceeding one acre, the information as to the number of these is mainly of interest from a social and economic point of view. So far as the purposes of agriculture are concerned, holdings not exceeding one acre may be excluded, for, apart from the difficulty to the enumerator of determining what plots of land not exceeding one acre may be regarded as agricultural, this class is mainly composed of gardens, labourers' allotments, &c., while the total area distributed amongst the 86,131 holdings is estimated to amount approximately to 39,800 acres. The great increase which has taken place since 1851 in the number of holdings not exceeding one acre is shown in the following table :—

Number of holdings not exceeding one acre, 1851-1910.

—	Leinster.	Munster.	Ulster.	Connaught.	Ireland.
1851,	16,017	8,488	6,950	6,273	37,728
1861,	14,447	9,825	9,270	8,019	41,561
1871,	16,844	11,172	12,729	7,703	48,448
1881,	17,289	11,828	14,733	7,146	50,996
1891,	17,696	14,922	17,026	5,984	55,628
1901,	25,513	22,582	19,599	6,634	74,328
1910,	29,831	27,045	22,161	7,094	86,131

From this statement it will be seen that of the 86,131 holdings returned as "not exceeding" one acre, 56,876 are in Leinster and

Munster. During the past eighteen years the increase in the number of these holdings has been especially marked in Leinster and Munster. In Ulster since 1891 the numbers have risen slowly. In Connaught the number of such holdings is small, and has shown little change.

Apart from these small holdings of one acre and under, the total number of holdings as shown by Census periods since 1841 is as follows :—

Total number of holdings exceeding one acre, 1841-1910.

—	Leinster.	Munster.	Ulster.	Connaught.	Ireland.
1841,	134,780	103,886	236,094	155,842	691,202
1851,	122,871	120,494	216,349	116,624	576,338
1861,	116,973	118,333	207,635	125,543	568,484
1871,	111,678	114,753	195,828	121,883	544,142
1881,	106,960	112,014	188,070	119,709	526,753
1891,	105,311	111,347	183,929	116,425	517,012
1901,	104,388	113,586	181,804	116,069	515,847
1910,	104,646	114,995	181,896	118,228	519,765

From this table it will be seen that for over fifty years the total number of holdings exceeding one acre continued to fall, at first rapidly, later more slowly. In the last decade this downward movement has spent itself, and the number of agricultural holdings is again slowly increasing. The above table, showing the changes since 1841, may be compared with the following table, which brings out the stationery character of the last decade :—

Total number of holdings exceeding one acre, 1901-1910.

—	Leinster.	Munster.	Ulster.	Connaught.	Ireland.
1901,	104,388	113,586	181,804	116,069	515,847
1902,	104,452	113,538	181,734	116,078	515,802
1903,	104,130	113,360	181,861	116,407	515,758
1904,	104,053	113,412	181,684	116,374	515,523
1905,	104,024	113,376	181,694	116,709	515,803
1906,	104,200	113,575	181,707	117,169	516,651
1907,	104,074	113,606	181,502	117,026	516,298
1908,	104,285	114,037	181,388	117,186	516,896
1909,	104,358	114,602	181,342	117,881	518,183
1910,	104,646	114,995	181,896	118,228	519,765

With regard to the changes which have taken place in the number of holdings in the several classes, the outstanding feature within recent years has been the increase in the number of holdings between 15 and 100 acres. In 1910 the total number of holdings between 15 and 100 acres has increased by 925 as compared with the number in 1909. The main points as to the number and distribution of the several classes of holdings exceeding one acre may be briefly presented in the following summary:—

Distribution of Holdings.

Holdings above one and under five acres, amounting in 1910 to 62,148, are comparatively evenly distributed among the four provinces. Ulster has 20,075, **Above One and under Five Acres.** Leinster 17,466—a large proportion relative to its total number of holdings—Connaught and Munster respectively 12,093 and 12,514. During the past ten years the total number of these holdings has been remarkably stationary. The total area of holdings over one and not exceeding five acres is estimated at approximately 225,000 acres.

This is the largest in number of the several classes of holdings in Ireland, amounting in 1910 to 154,088. Regarding the number and proportion of these **Above Five and not exceeding Fifteen Acres.** holdings there is a marked contrast between, on the one hand, Ulster and Connaught, and on the other hand, Leinster and Munster. In Ulster more than one-third of the total number of holdings over one acre belongs to this class, and in Connaught the proportion is still greater, whereas in Leinster such holdings amount to less than one-fourth, and in Munster to about one-sixth. The total area of the holdings “above five and not exceeding fifteen acres” is estimated as approximately 1,618,000 acres.

In 1910, holdings above fifteen and not exceeding thirty acres numbered 136,681. This class since 1851 **Above Fifteen and not exceeding Thirty Acres.** has been in number remarkably stationary, gradually falling, and of recent years slightly increasing. As in the holdings between five and fifteen acres, so in those between fifteen and thirty acres, Ulster and Connaught have absolutely and proportionately a much larger number than Leinster or Munster. But in the present case the disparity is not so great, Ulster having 53,882 in 1910, Connaught 36,070, Munster 24,592, and Leinster 22,137. The total area of such holdings is estimated at approximately 3,060,000 acres.

It will thus be seen that in Ireland, out of a total of 519,765 holdings exceeding one acre, 352,917 are of a size not exceeding thirty acres, and comprise less than one-fourth of the total area of the country.

The total number of holdings in this class amounted to 75,918 in 1910. The change has been slight since 1851, when the number was 70,093, and the increase has occurred mainly in Ulster and Connaught, and to a much less degree in Munster. In Leinster, on the other hand, this class has tended to decrease. The numbers for the several provinces in 1910 were as follows:—Ulster, 25,379; Munster, 22,605; Leinster, 15,513; Connaught, 12,421. The total area of these holdings may be estimated approximately at 3,069,000 acres.

The total number of holdings in this class in 1910 was 58,710. Since 1851, when there were 49,940 such holdings, there has been a considerable increase, but the past decade has done little more than maintain the number reached.

Munster has much the largest proportion of such holdings, viz., 23,157; Ulster, 14,732; Leinster, 14,357; Connaught, 6,464. The total area included in this class may be estimated approximately at 4,319,000 acres.

The total number of holdings in this class in 1910 was 22,817, of which 9,424 were in Munster, 6,950 in Leinster, 3,656 in Ulster, 2,787 in Connaught. In 1851 the number was 19,753, and while in the earlier decades there was a considerable increase, in recent years a slight decrease has been evident. The present area of these holdings may be estimated approximately at 3,441,000 acres.

In 1851 the number of these holdings was 7,847 (in 1861, however, the number was 8,329); in 1910 the number was 7,821. Of these there were in Leinster, 2,728; in Munster, 2,629; in Connaught, 1,461; and in Ulster, 1,003; comprising a total area which may be estimated approximately at 2,686,000 acres.

The number of these holdings increased from 1,457 in 1851 to 1,568 in 1871, and has with slight yearly fluctuations remained comparatively stationary. In 1910 the number was 1,582. Of these there were in Connaught, 474; in Leinster, 423; in Munster, 382; and in Ulster, 303.

In general, regarding the changes in the size and distribution of the holdings in Ireland, three periods may be distinguished during the past sixty years. The first, in which change was catastrophic,

had closed before the Census of 1851. The number of holdings between 1 and 15 acres in extent—amounting in 1841 to 562,235—was reduced roughly by half to 279,937 in 1851, while the number of holdings of an extent exceeding 15 acres was greatly increased. Holdings between 15 and 30 acres rose from 79,342 in 1841 to 141,311 in 1851. Holdings exceeding 30 acres rose from 48,625 in 1841 to 149,090 in 1851. The second period, extending from thirty to forty years after 1851, marked a still further decline in the number of holdings over 1 and not exceeding 15 acres, with a corresponding increase in the larger classes of holdings. In the third period, that of the past twenty years, excluding holdings not exceeding one acre, there has been a comparative absence of change. From year to year fluctuations are seen, but when the view stretches over a series of years no continuous change can as yet be discerned.

It will be observed from the study of the tables that Ulster is pre-eminently the province of small holdings. Altogether it had in 1910 only 19,694 holdings exceeding 50 acres in extent, whereas it contains 162,202 holdings of an extent above 1 and not exceeding 50 acres. Moreover, of these the greater number are between 5 and 30 acres in area. On the other hand, Munster is pre-eminently the province of holdings between 30 and 200 acres. In 1910, of its total number of holdings, exceeding one acre, viz., 114,995, no less than 55,186 were of a size above 30 and not exceeding 200 acres. Further, it may be noted that among these holdings the proportion not only of those above 50 acres, but of those exceeding 100 acres in area is, when compared with the other provinces, relatively large. In Leinster there is no such predominance of small or large holdings, but every class is well represented. Leinster has, however, the largest number of holdings, exceeding 200 acres. In Connaught the most striking feature is the contrast, marked even more strongly than in Ulster, between the large number of holdings from 5 to 30 acres in extent, and the small number between 30 and 100 acres. To the former class belong more than two-thirds of the total number of holdings in Connaught exceeding one acre, whereas of holdings from 30 to 100 acres there is a much smaller proportion than in any other of the provinces. On the other hand, Connaught has the largest number of holdings "above 500 acres."

In many instances landholders occupy more than one farm and in other cases farms extend into two or more townlands, the portion in each townland being enumerated and classified as a separate holding.

**Number of
Occupiers**

With a view, therefore, of ascertaining the number of occupiers, and of classifying them according to the total extent of land held by each each enumerator is required to furnish the name of every landholder residing in his district who has two or more farms, or whose farm extends into two or more townlands, together with the area of each portion and the locality in which it is situated. From the number of

actual occupiers thus arrived at, it appears that in 1910 there were 605,896 holdings in the hands of 555,125 occupiers—the number of occupiers in Leinster being 124,102, in Munster 126,891, in Ulster 188,612, and in Connaught 115,520.

I have the honour to be, Sir,

Your obedient Servant,

THOMAS BUTLER,

Superintendent of Statistics and

Intelligence Branch.

DEPARTMENT OF AGRICULTURE

AND TECHNICAL INSTRUCTION FOR IRELAND,

UPPER MERRION STREET, DUBLIN.

6th November, 1911.
